FANTASTIC VENUE IN THE
HEART OF LONDON

WELCOME TO OUR FABULOUS VENUE IN THE HEART OF LONDON

Events@No6 opened its doors in 2019, in an innovative venue in bustling Aldgate, close to the City of London.

Facilities include a variety of bright meeting rooms hosting from 2 to 210 guests with in-built AV, flexible breakout spaces and a large cloakroom. Our flexible spaces are available weekdays, evenings and weekends and can accommodate fine dining for up to 150.

The tranquil terrace with stunning views of London's iconic skyline is idea for summer receptions for up to 60 guests.

OUR SPACES

Three executive meeting rooms

Ideal for senior-level boardroom meetings, or smaller group meetings and training, for up to 12 guests.

Elizabeth Room

Versatile, light and airy space perfect for conferences, exhibitions, exams, team building exercises, screenings, dining, weddings and evening entertaining. The hire of this room includes fully integrated audio visual equipment, AV support, an event coordinator, Wi-Fi and blackout blinds. The adjoining breakout area is ideal for registration and catering.

Four second floor rooms

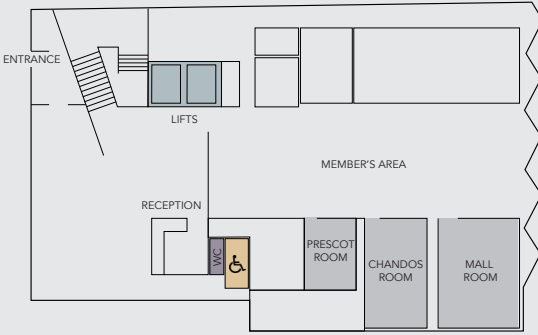

These rooms can be hired as a suite or individually providing you with a variety of meeting, breakout and catering space options. Each space has large floor to ceiling windows and is fully supported with in-built AV.

Terrace room

The main room is flanked by two adjoining terraces, ideal for summer receptions, revitalising team away days and weddings.

Take in the views and spot some of London's landmarks across its iconic skyline including the Shard, the Gherkin and the Cheesegrater to name just a few.

U-Shape	32
Solid Boardroom	48
Hollow Boardroom	52

PIONEERS FOR PEOPLE AND PLANET

The building itself has been designed by Bennetts Associates, the first and only architectural practice in the world to have approved science-based targets and be carbon neutral via the United Nations Climate Neutral Now framework. The atrium and floor to ceiling heights allow good levels of useful daylight to be achieved which reduces the need for lighting power, and where lighting is required LEDs have been specified.

In terms of wellbeing the displacement ventilation uses air-change levels well over those used in traditional servicing strategies and provide improved air quality. Good access to daylight is also proven to improve productivity and happiness.

The building also has a biodiverse green roof that will provide habitats for local bird and insect species, as well as reducing water run-off and reducing the urban heat island effect.

Our core values are to reduce, reuse and to recycle, and we work to the following standards:

Measure our impact

- Uphold zero-to-landfill business status.
- Remain fully aware of all environmental legislation and ensure that regulatory requirements are met.
- Ensure all disposables provided are the best environmental fit for the client's waste management systems.
- Endorse the use of filtered water systems that negate the delivery, storage, and recycling of mineral water bottles.
- Utilise eco-friendly chemicals.
- Purchase paper products made from recycled materials and from sustainably managed forests.
- Facilitate the use of public transport with all staff.
- Train staff to reduce their energy and water usage on site.
- Promote environmentally-friendly alternatives to clients and customers across all areas.
